

FEMA P-2055

Post-Disaster Building Safety Evaluation Guidance

Course Description

This course presented through a partnership with the National Earthquake Technical Assistance Program.

This free training on FEMA P-2055, Post-Disaster Building Safety Evaluation Guidance provides an overview of existing procedures for post-disaster building safety evaluations and issues related to structural safety and habitability. Guidance is also presented on planning, managing, and implementing safety evaluation programs before and after a disaster incident. The training serves as a comprehensive review of all facets of post-disaster safety evaluations, covering deployment management, secondary hazard events, requirements for health or occupants, and discussions on interim post-disaster use of buildings.

Audience

Architects, engineers, building officials directly involved in post-disaster building safety evaluation, policy makers at all levels of government, emergency managers, and health officials who may be involved in management of the post-disaster evaluation process.

Course Tuition

- This training is DHS/FEMA grant eligible.
- All local responder agencies should contact their respective County/Tribal Emergency Manager. State agencies should contact IOEM Training.
- There is no cost for this class.

Course Completion

Participants who actively participate, attend the entire course, and successfully complete the course will receive a Certificate of Completion.
